ABOUT ME

Fullstack Developer dedicated to building high-performance digital products by bridging complex backend logic with fluid, user-centric interfaces. Experienced in designing distributed architectures, optimizing system reliability, and delivering polished e-commerce and management solutions. With a deep interest in modern system design, I excel at solving complex technical challenges and collaborating with teams to deliver high-impact web applications.

EDUCATION

SMK NEGERI 1 GARUT | 2016-2019

Computer and Networking Major

Universitas Terbuka | 2025 - present

Bachelor of Data Science

WORK EXPERIENCE

Kitech Digital | 2023 - 2026

Fullstack Developer

- Develop and maintain high-performing web applications, ensuring optimal user experience and system stability.
 - Integrate third-party APIs and services to extend application functionality and streamline business operations.
 - Implemented secure payment gateway integrations, significantly reducing transaction friction and improving the checkout experience for e-commerce users.
 - Engineered a custom web builder tool, empowering non-technical clients to manage content independently and effectively reducing support ticket volume.
-
